SEPT 2021

BLACK IN ANATOMY

NEWSLETTER

UPDATES

This month marks the launch of Black in Anatomy's first ever newsletter, created by our members Iryna and Naomi. We are so excited to finally share it with you all!

Our team has also been working hard planning Black in Anatomy week, and growing the Black in Anatomy community with members and allies.

WANT TO BE FEATURED?

Please submit your nominations for our next newsletter by September 20th on our website or using the QR code below!

IMPORTANT DATES

BLACK IN ANATOMY WEEK

October 11th - 15th

On October 15th we will also be celebrating World Anatomy Day!

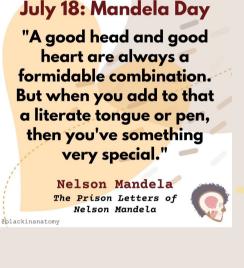

ANNIVERSARY October 16th

Join our virtual celebration!

KRISTEN MCPIKE, MS

A liver with cirrhosis,

scarring of liver tissue

"Role of p63 in Craniofacial Muscle Development" at the Experimental Biology 2021 conference. Her poster discussed the differences in the structure of pharyngeal arch-derived muscles between embryonic p63 wildtype and mutant mice. See full post >

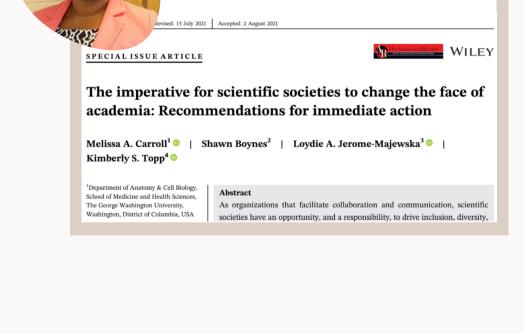

ALLISON NESBITT, PHD

Co-authored a paper in the May 2021 issue of the Journal of Human Evolution,

"Assessing the Status of the KNM-ER 42700 Fossil Using Homo erectus Neurocranial Development", which studied the neurocranial shape of a 1.5 million year old possible juvenile Homo erectus fossil and compared it to the growth trajectory of other young and adult hominin fossil, human, and chimpanzee crania. See full post > MELISSA CARROLL, PHD

Co-authored 3 manuscripts:

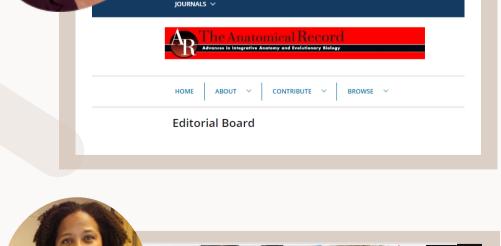

Anatomical Competence: Threshold

1) "Movement System Theory and

Concepts for Physical Therapist Anatomy Education" in Anatomical Sciences Education. See full post > 2) "Call for Consistency: the Need to Establish Gross Anatomy Learning Objectives for the Entry-Level Physical Therapist" in the Medical Science Educator. See full post > 3) "The Imperative for Scientific Societies to Change the Face of Academia: Recommendations for Immediate
